SUMMARY

I am a second-year Industrial Engineering student at Azerbaijan State University of Economics. While pursuing my degree, I've developed a strong passion for full stack or MERN (MongoDB, Express.js, React, Node.js) development. Although I haven't had prior experience or internships, I am actively learning HTML, CSS, and JavaScript. Additionally, I've recently begun exploring the React framework. I've completed a Udemy course covering HTML, CSS, and Bootstrap, and I'm currently enrolled in Udemy courses focusing on React. I'm also enhancing my skills with a Coursera course centered around Git and GitHub. My commitment to learning and my enthusiasm for becoming a skilled developer drive me to excel in this field.

EDUCATION

BACHELOR OF INDUSTRIAL ENGINEERING

Azerbaijan State University of Economics

2022-2026(expected)

Selected courseworks:

- Introduction to industrial engineering;
- Engineering and computer graphics;
- Linear algebra and analytic geometry;
- Ergonomics and technical design;
- Mathematical analysis

CERFTIFICATION

Completed "Web Tasarım Uzmanı Olmak İçin: HTML, CSS ve Bootstrap Kursu" course from Udemy and acquired certificate
